

WARNING.

We wish to caution all users of Simmons Liver Regulator on a subject of the deepest interest and importance to their health. The sole proprietors and makers of Simmons Liver Regulator have been informed that customers are often deceived by buying and taking some medicine of a similar appearance or taste, believing it to be Simmons Liver Regulator. We warn you that unless the word Regulator is on the package or bottle, that it is not Simmons Liver Regulator. No one else makes, or ever has made Simmons Liver Regulator, or anything called Simmons Liver Regulator, but I. H. Zelin & Co., and no medicine made by anyone else is the same. We alone can put it up, and we cannot be responsible, if other medicines represented as the same do not help you as you are led to expect they will. Bear this fact well in mind, if you have been in the habit of using a medicine which you supposed to be Simmons Liver Regulator, because the name was somewhat like it, and the package did not have the word Regulator on it, you have been imposed upon and have not been taking Simmons Liver Regulator at all. The Regulator has been favorably known for many years, and all who use it know how necessary it is for Fever and Ague, Biliousness, Constipation, Headache, Dyspepsia, and all disorders arising from a Disordered Liver.

We ask you to look for yourselves, and see that Simmons Liver Regulator, which you can readily distinguish by the Red Z wrapper, and by our name, is the only medicine called Simmons Liver Regulator.

I. H. ZELIN & CO.

Take Simmons Liver Regulator.

IN CINCINNATI HOTEL CORRIDORS.

(Cincinnati Commercial Tribune, Oct. 18th.) The venerable and historic Kentucky orator, soldier and statesman, General Cassius M. Clay, who for sixty-five years has been an interesting and picturesque figure in the affairs of his State and Nation, arrived last evening from his home at Whitehall, Ky., and will remain in the city for several days, with headquarters at the Grand Brutus J. Clay and wife, of Richmond, Ky., his son and daughter-in-law, accompany him. The object of his trip here is to submit his eyes to the treatment of a local oculist, a cataract formation having recently considerably obscured his eyesight.

General Clay will be 87 years old the 19th of this month, but his thick shock of hair, albeit of snowy whiteness, which he wears combed over his forehead without parting, his sturdy frame and the vigor of his mind and body would lead one unacquainted with the date of his birth to suppose him by many years a younger man.

Those whose memory carries them back to the days when the settlement of "the irrepressible conflict" was the question upon which all politics was founded will remember the active part which Cassius M. Clay took in the agitation against negro slavery. His name, from 1840 to the close of the rebellion, was as much of a household word as were those of Horace Greely, Wendell Phillips and William Lloyd Garrison. The son of a slaveholding parent, the member of an already illustrious family, and the native of a strongly proslavery state, the prominent part he took in opposition to the institution of slavery attracted wide spread attention abroad, and aroused the bitterest antagonism among those of his neighbors who differed from his views.

The stirring incidents of his long public career have been related some extent in a book of memoirs published by him in Cincinnati in 1888, all that he has been and done are yet a subject for more adequate treatment at the hands of a future historian. From the time he graduated from Yale College in 1822 down to a few years ago he was a potent factor in every contest in which his State and Nation were concerned.

While a rising attorney and as a member of the Kentucky Legislature, he denounced slavery by voice and pen, and in 1845 he engaged in the daring undertaking of publishing an outspoken antislavery newspaper in Lexington. Threats of mob violence having been made against him and his office, he put two local law-abiding men armed with a bowie and with a pair of pistols in an open-mouth grip, which he placed before him.

He went to the Mexican War, and as Captain of a veteran military company, which had seen service at Tippecanoe, he distinguished himself by his bravery and his presence of mind in the midst of great danger.

He supported Fremont, and afterward Lincoln, and was appointed Minister to Mexico in 1861. After a year in this service he resigned, and was given a commission as Major General of volunteers. He held this office only a few months, and was reappointed Minister to Russia, where he remained until in 1869. While Minister to Russia he became aware that Alaska could be purchased, and it was due to his reports and recommendations that the United States acquired this important territory of real fur and gold. In 1870 he took an active part in behalf of the Cuban revolutionists, publicly supporting their cause, and becoming President of the Cuban Aid Society.

"I am always ready to give an opinion on public questions," said General Clay to a Commercial Tribune reporter at the Grand Hotel last evening, "but on purely political matters I have nothing to say. I have never been a party man. The main objects of my life were the abolition of slavery and the improvement and extension of the common school system. These have been accomplished facts."

DR. K. & K. The Leading Specialists of America 20 YEARS IN OHIO. 250,000 Cured.

WE CURE STRICTURE. Thousands of young and middle-aged men are suffering from this disease, many of them for years. They are frequently unconscious of it. It is a disease of the prostate gland, which is situated at the base of the bladder, and is caused by a variety of factors, including inflammation, infection, and mechanical injury. It is a disease which is often mistaken for gonorrhea, but it is a distinct and separate condition. The symptoms are a burning or stinging sensation when urinating, a frequent need to urinate, and a discharge of pus or blood from the urethra. If left untreated, it can lead to serious complications, including infertility and kidney disease. Dr. K. & K. have developed a unique and effective treatment for this condition, which has cured thousands of men. Their treatment is based on a thorough understanding of the anatomy and physiology of the prostate gland, and it is designed to eliminate the underlying cause of the disease. It is a safe and painless procedure, and it has been found to be highly effective in all cases. Dr. K. & K. are located in Cincinnati, Ohio, and they have a large number of branches throughout the United States. They are the only specialists of their kind, and they have a long and distinguished record of success. If you are suffering from stricture, do not delay. Consult Dr. K. & K. today, and you will be on the way to a complete and permanent cure.

strong in this section. The Democrats are on the alert and ready for the fray. Mr. John Prather and Miss Amanda Agee were married October 6th, at an expense by Rev. I. N. Douglas, who is an expert hand at the business.

Bro. Walter Baughn has just closed a series of meetings at this place. He is a forcible preacher and did much for the people of this community and his meetings were largely attended.

The lands of Jesse Newby, deceased, was sold to the highest bidder last Thursday, October 28th. The home place brought \$20 per acre and the farm in Fayette county brought \$44.50 per acre.

FARMERS' COLUMN.

[Farmers' Home Journal.]

In pushing fattening animals on corn only some of it will pass through them undigested. Cob meal helps to correct this. If you have no way to grind the cobs, the same thing may be accomplished by feeding corn meal in connection with cut and dampened hay.

The garden spot should be plowed this fall and given a dressing of well rotted manure. If an orchard is to be set out, it is a good plan to subsoil the land now, for nothing will put it in better shape.

Thumb and finger during the summer and a sharp knife during the winter are all that should, in ordinary circumstances, be needed to do necessary pruning. The best rule is never to remove a branch without good reason.

When insects of all kinds are so plentiful, then let the birds also be plentiful. The latter in crease far less prolifically than do the worms and insects, and there is no danger of the corn becoming overstocked with birds.

There can hardly be considered any best time to prune. In some conditions one time is best, and in others another. The growth and condition of the trees, the object to be procured, with other things, must always be considered.

Store the onions where they can be kept out of the sun and spread thinly, then there will be no trouble in keeping them until cold weather. If piled, they will soon heat and rot. If you have no such place, better sell them than to try storing.

The farmer considers the robin one of his greatest pests. By actual test this bird daily consumes 140 per cent. of its own weight in insects. Such an indefatigable insect destroyer surely should be welcome to the little fruit he pillers for desert, if he wants it.

Trees want feeding as well as do pigs or cattle, to produce growth or fruit; it is a mistake to try to raise crops year after year from an orchard without returning anything to the soil; and horses and cattle are likely to overeat the food if you leave the trimming to them.

It is a mistake not to trim and shape the trees when young, and thus avoid the necessity of removing large branches when the trees are growing, which means but mutilation and injury; and it is equally wrong to let too much fruit mature on young trees, or on any trees for that matter.

Our object in sowing wheat with a drill is not only to get an even distribution of the seed, but to get a furrow which will help to hold the seed in the soil, and the furrow will gradually crumble down upon the roots and cover them as they are heaved out by frost.

Sniffower seeds make an excellent poultry food, but, in addition to this, every bushel will produce about a gallon of oil, worth perhaps \$2. Let the boys have a trial at it; it will interest them and there is very little chance for a failure.

Pay some attention to things which make life pleasant, and the honest money making will not prosper any the less, and the wife and the children will like the farm better. Do not grow over a vegetable garden nor sow a lot of flowers; see the yard bright, and you will not go back to the old order of things. If you have an attractive homestead you will be the first to look to it to callers.

Peaches may be grown in many places where they now or not. If sheltered on the north and east from cold winds by hedges, buildings or high fences. Let the roots be mulched well, to prevent the warmth of the sun in early spring from starting them too soon an subjecting the buds to the probability of being killed by later frosts. A full crop is desired more than extreme earliness.
